BUILT TO  
PERFORM.

# Built to Perform<sup>®</sup>.

“At Integrity<sup>®</sup> from Marvin<sup>®</sup> Windows and Doors, we didn’t join the fiberglass window and door industry – we pioneered it. In 1994, Integrity was born from The Marvin Companies’ century-long heritage of service, craftsmanship and quality with a focus on all-out performance.”

*Susan Marvin*

Integrity windows and doors are made with Ultrex<sup>®</sup>, a pultruded fiberglass with a patented acrylic capping that outperforms and outlasts vinyl, roll-form aluminum and other fiberglass composites. We use Ultrex and our proprietary pultrusion process to manufacture high-demand windows and doors that endure all elements without showing age or wear.

Though we are dedicated to leading the way in innovation, we never forget the cornerstones of our business. We are highly selective in choosing our business partners – including independently-owned dealers and distributors – to ensure our customers have the best experience possible. We use an efficient manufacturing and delivery system so our products are received when expected. We create products to be easily installed and operated with virtually no maintenance required.

Our values and work ethic are forged by the communities where we’re proud to make our quality products. When you choose Integrity windows and doors, you support a small-town, family-owned and operated company with deep roots in the community; some Marvin employees are fourth-generation, following the family tradition. We share profits with our employees; we support our communities; we treat our dealers and customers fairly and with respect.

**At Integrity, we believe it is essential to live up to our name.**

# Overachieve

THE REPUTATION LIVES ON.

One hundred years of innovation and uncompromising product performance standards: that's the legacy of Marvin Windows and Doors.

Our history was built on quality craftsmanship, a reputation for excellent service and a commitment to community. Today, third- and fourth-generation Marvin family members remain actively involved in the company, keeping the original spirit of corporate responsibility alive.

So when you specify Integrity, you can rest assured that every window and door is protected by a company renowned for standing behind its products with world class service and support for nearly a century.

In the end, our promise to you is simple: durable, high-performance products that bring lasting value to your home.

Our history was built on quality craftsmanship and a reputation for excellent service. Our future incorporates the unique innovation of Ultrex.

THE MATERIAL  
YOU CHOOSE FOR YOUR  
WINDOWS AND DOORS  
MATTERS

Get tough

8X  
STRONGER  
THAN VINYL\*

ULTREX FIBERGLASS OFFERS UNMATCHED PERFORMANCE AND UNBEATABLE SATISFACTION.

Durable doesn't begin to describe how tough Ultrex® fiberglass is. Strong, stable, and virtually indestructible, ULTREX FIBERGLASS IS QUITE POSSIBLY THE PERFECT BUILDING MATERIAL®, creating windows and doors that leave other materials in the dust.

Made from pultruded fiberglass, Ultrex outperforms the competition on nearly every measure. Non-conductive and non-corrosive, Ultrex resists the ravages of heat, cold, time and pressure to provide the most worry-free windows and doors available today.

Pioneered by Marvin®, Ultrex has what it takes – from its durability and performance characteristics, to its first-to-market and ingenuity – to create products of incomparable value.

Low-maintenance and high-durability. Everything you want your home to be, and everything that Ultrex delivers.

**Pultruded fiberglass**

Thin strands of strong glass cables, saturated with compounded resins to create a durable material.

**All Ultrex interior**

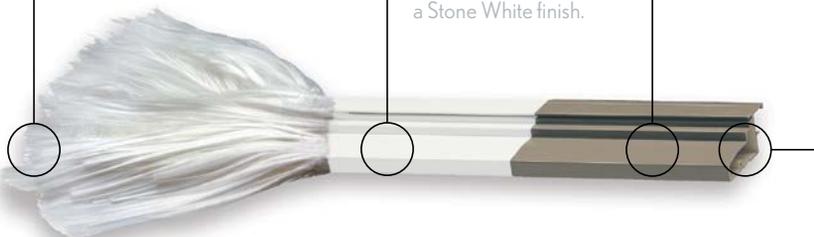

The interior is created with the same durable Ultrex fiberglass as the exterior and is offered in a Stone White finish.

**All Ultrex exterior**

Integrity's patented factory finish meets AAMA 624-10 performance requirements and is available in Stone White, Pebble Gray, Cashmere, Bronze, Evergreen or Ebony. Can be painted with no impact on its protective properties.

**Ultrex Construction**

The patented and advanced thin wall construction technologies of Ultrex allow for detailed profiles and component optimization, as well as superior aesthetics and performance.

\* Comparison of Flexural Modulus.

## Temperatures may fluctuate, but Ultrex® won't.

Ultrex has an extremely low rate of thermal contraction and expansion. In fact, it expands and contracts at virtually the same miniscule amount as glass, maintaining a tight seal with no leaks, seal failures or stress cracks that can compromise energy-efficiency and long-term performance.

This is especially so when compared to vinyl, which can distort in extreme heat and crack in fluctuating temperatures. But Integrity® windows and doors can withstand temperature extremes while maintaining a tight seal.

## 3x less expansion than wood/vinyl composites.

Ultrex resists distortion even at temperatures up to 285°F. Rapid temperature change doesn't faze Ultrex: When the mercury climbs from -30°F to 70°F, a 6' stile changes less than 1/32" in length.

## Designed for beauty. Engineered for life.

Our 20+ years of experience in the composite fenestration industry led us to ensure that every part is optimized for the ultimate in performance and fit, including detailed radius profiles and clean, balanced sightlines.

Windows and doors made with Ultrex won't get scratched, dinged or marred as easily as vinyl. Our patented, mechanically bonded acrylic finish is up to three times thicker than competitive finishes, and it resists UV degradation up to five times longer than vinyl – even on dark colors.

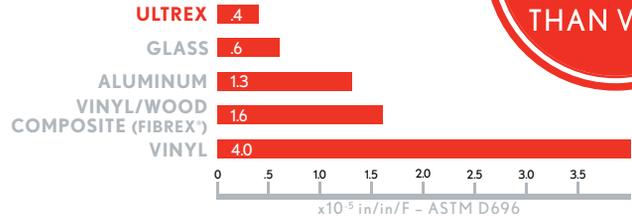

## Premium Finish.

Ultrex is the *first and only* fiberglass finish to be verified to 624-10, AAMA's voluntary finish specifications for fiber reinforced thermoset profiles (fiberglass). The Ultrex patented acrylic cap finish is verified AAMA 623-10 and 624-10, and has passed the AAMA 625-10 lab based performance test protocols; 625-10 outdoor weathering test protocols are in process.

## EXPANSION MEASUREMENT

Ultrex expands and contracts at virtually the same rate as glass.

The tensile strength of Ultrex means one square inch can support up to 34,000 lbs. So, two monster trucks? No problem.

So now imagine how much your entire window can handle!

And Ultrex is so tough, we have to use diamond-edge blades just to cut it to size.

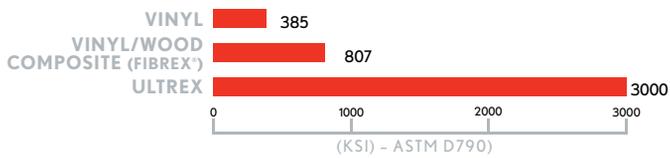

# Ultrex® fiberglass. Quite possibly the perfect building material.®

# Stay true

Ultrex® fiberglass also stands up mightily to rain, wind, heat and time, looking beautiful and performing well long after other window and door materials have lost their luster.

## FLEXURAL MODULUS

**38%**  
FIBERGLASS WINDOWS  
HAVE A 38% LONGER  
USEFUL LIFE EXPECTANCY  
THAN VINYL\*

**8X**  
STRONGER  
THAN VINYL

## Stability.

The strength of Ultrex fiberglass also translates into superior stability. Ultrex is more rigid than vinyl and wood/vinyl composites. So issues of instability and less-than-perfect alignment that can complicate installation – and long-term performance – are not a concern with Integrity® windows and doors.

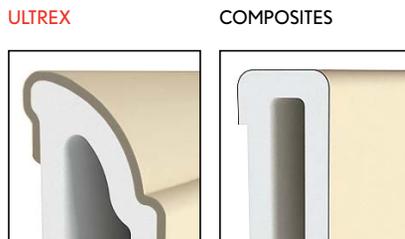

The exceptional strength and stability of Ultrex eases installation and establishes a secure, long-lasting fit that stays square and true under all conditions.

## Built to Perform®

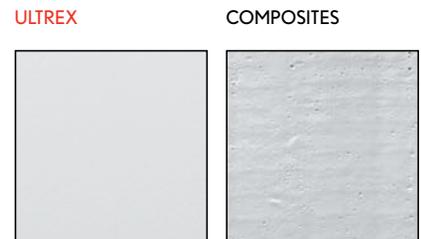

It's more than our tagline, it is our promise to you. Ultrex is so resilient, it outperforms and outlasts vinyl and vinyl/wood composites, time and time again. Strong yet light, Ultrex provides sturdy, reliable support from top to bottom, end to end.

Integrity windows have a clean glazing bead profile and have solid, square, weathertight joints. Vinyl corners can arrive with messy welded corners and joints that aren't square.

With a finish up to 3x thicker than competitive finishes Integrity products won't dent, crack, chip, or peel. Its unmatched detailed profiles and superior tooling capabilities provide for a cleaner fit and finish.

Integrity windows use a patented, mechanically bonded finish, shown on the left, compared to the competitive finishes that are painted on and can be unsightly.

\* "Life cycle assessment of windows for the North American residential market: Case Study" by the University of British Columbia Scandinavian Journal of Forest Research, 2008.

"We are always striving to be better, more efficient, and of course more sustainable.

It's a proud part of our culture and will continue to be for generations to come."

Susan Marvin, Vice Chair of the Board,  
Marvin® Windows and Doors

# Pioneers

One hundred years of innovation and uncompromising product performance standards: that's the legacy of Marvin Windows and Doors. And it's why we build energy efficiency into every Integrity from Marvin product.

## A history of integrity.

Marvin has a long history of product innovations, industry firsts and commitment to community. Integrity® Windows and Doors takes pride in the fact that our corporation is green-minded with recycling efforts and employee awareness. In addition, we incorporate green components into our product packaging and even our distribution process.

Beyond that, being green is also about conserving energy – and Integrity is energy efficient. Not only are the products extremely durable, Integrity from Marvin was the first major window and door manufacturer to offer its ultra durable Ultrex® energy-efficient Low E2 insulated glass with Argon and ENERGY STAR® qualified performance on all of its standard windows and doors.

Today, Marvin is credited with several industry firsts and is recognized for innovative products and uncompromising product performance standards. Third- and fourth-generation Marvin family members remain actively involved in the company and keep the original spirit of corporate responsibility alive today.

## Superior performance you can feel good about.

At Integrity, sustainability is part of the manufacturing philosophy: make a product able to withstand the power of the great outdoors, while preserving the natural resources from which it was made.

- Ultrex is made from silica sand, a safe and renewable natural resource.
- The Ultrex manufacturing facility captures and destroys 95% of all VOCs.
- The Ultrex manufacturing facility fully complies with the 1990 Clean Air Act and has been designated as a Maximum Achievable Control Technology (MACT) facility as outlined by the Environmental Protection Agency (EPA).
- The glass in our products contains 15%-33% recycled content.
- Integrity products offer ENERGY STAR qualified performance.
- Even more green awards and information at [IntegrityWindows.com](http://IntegrityWindows.com).

# Shine on

CREATE A MORE COMFORTABLE INTERIOR AND LOWER ENERGY BILLS – REGARDLESS OF THE SEASON.

REDUCE  
COOLING  
COSTS BY  
7-15%\*

Keep heat inside during cooler weather and block the sun's rays during warmer weather with double-pane windows with Low E coating.

Ultrex® fiberglass resembles materials like wood that create an insulated barrier – keeping extreme weather outside.

## Stellar energy performance ratings.

The NFRC defined an energy performance rating system for the entire window and door industry. It rates:

- U-factor, or how well a window keeps heat inside a building.
- Solar heat gain, or a window's ability to block warming caused by sunlight.
- Visible light transmittance, or how much light gets through a product.
- Air leakage or heat loss and gain by infiltration through cracks in the window assembly.

Fortunately, Ultrex is far less conductive than aluminum. It provides an insulated barrier against extreme weather temperatures, keeping homes comfortable, and reducing heating and cooling costs.

The National Fenestration Rating Council, the Department of Energy, and the U.S. Environmental Protection Agency were all impressed, **so much so that Integrity® Windows and Doors received one of the highest performance ratings.**

## Environmentally sound, in more ways than one.

Integrity from Marvin® takes our Built to perform® philosophy to heart, and works diligently to ensure that we hold ourselves to the highest quality and environmental standards possible. That is why Integrity from Marvin is proud that our Fargo facility is both ISO 9001:2008 and ISO 14001:2004 certified.

The International Organization for Standardization (ISO) is a worldwide federation established in 1947 that defines standards for Quality Management Systems (ISO 9001:2008) and Environmental Management Systems (ISO 14001:2004). These universal standards allow companies to provide more streamlined and efficient transactions, and help companies facilitate quality and environmental sustainability throughout their organizations.

ISO certification is a voluntary undertaking and speaks to the depth of an organization's commitment to quality and the environment.

Integrity from Marvin willingly took on this challenge in an effort to raise our own high standards of quality and test our quality management systems against the world's highest standards.

To receive certification, Integrity underwent an extensive detailed audit process that requires an unwavering commitment to quality and the environment and continuous resolve for improved management systems. Integrity Windows and Doors is proud to have achieved both our ISO 9001:2008 and ISO 14001:2004 certification and will continue to focus our efforts to ensure consistent quality and environmental standards in serving you now and into the future.

For more information on the International Organization for Standardization (ISO) and their certifications, visit [www.iso.org](http://www.iso.org).

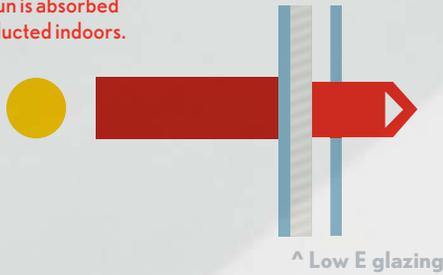

Low E and Argon gas means UV rays are screened to reduce fading and damage to upholstery and carpets. Integrity® offers both Low E2 and Low E3 glass for the ultimate in energy efficiency.

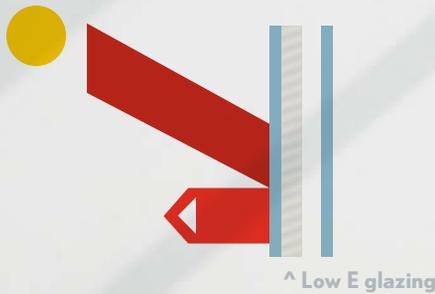

**5000x**  
LESS CONDUCTIVE  
THAN ALUMINUM =  
REDUCED ENERGY COSTS

Winter sun is absorbed and conducted indoors.

Summer sun is filtered and reflected back outdoors.

### Save energy costs without sacrificing comfort.

Integrity from Marvin® offers a complete line of ENERGY STAR® qualified windows and doors. ENERGY STAR qualified windows can save you 15% of your total energy bill.\*

### First, Ultrex® is 5000 times less conductive than aluminum.

Next, we were the first major window and door manufacturer to offer energy-efficient Low E2 glass and ENERGY STAR qualified performance on all of our standard windows and doors. Compared to non-qualified products, ENERGY STAR qualified windows and doors cut heating and cooling costs by 7-15%.\*

And now Integrity offers Low E1, Low E2, Low E3 insulated glass with Argon gas, which has thermal conductivity 30% lower than that of air. It adds improved solar and thermal protection by distinguishing between visible light and damaging UV and near-infrared rays to offer the ultimate glass performance, and provides a selection of energy-efficient solutions depending on your climate and needs.

\* ENERGY STAR at [energystar.gov](http://energystar.gov)

### Limitless options mean remodeling bliss.

Wanting a window or door that adds to the overall aesthetic of your home, while keeping with its general character isn't easy during a remodel. Fortunately, All Ultrex® from Integrity® can help.

From its sustainable Ultrex fiberglass construction and ENERGY STAR® qualification, to its special sizing (to 1/64") and proven on-time delivery – you can be confident that Integrity is the right choice now and for the future of your home.

For more than 15 years, we have been the go-to product for building professionals. From commercial to residential and new construction, to remodeling and replacement, All Ultrex has the solution for your job site.

No matter the project, Ultrex fiberglass has you covered.

**On-time delivery, every time.**

Managing a project can be difficult enough without worrying about your window or door order. Integrity's 10 day delivery to local distributors has been consistently providing complete defect-free window and door orders for over 10 years.

# Pro's choice

Condos, townhouses, public housing, schools, businesses, banks, retail, churches...  
whatever your project, Integrity® has the experience to meet your needs.

**Perfect fit and built to last.**

Every commercial project has its own unique requirements and Integrity is equipped to meet those challenges. Our unique Ultrex® fiberglass construction, factory services, unmatched delivery and dedicated service and support personnel make Integrity the perfect choice.

Easy to specify, easy to order – our short lead times, consistent delivery and remarkable quality make your life easier.

Weather-tight, solid and durable Ultrex® material means there are virtually no call-backs. Plus, we ensure that every part is optimized for the ultimate in performance and fit, including detailed radius profiles and clean, balanced sightlines for an architecturally inspired appearance.

Designed to last for generations, Integrity® is backed by a fully transferable 20/10 warranty (10-year coverage on manufacturing materials and workmanship, and 20-year coverage on glass).

# Rest assured

WE MAKE INSTALLATION SIMPLE AND EFFICIENT.

Builders, contractors, architects and homeowners all agree: Integrity windows and doors are designed for excellence.

HOMEOWNERS  
APPRECIATE THE  
**PEACE OF MIND**  
OF INTEGRITY®  
PRODUCTS

**10 DAY**  
DELIVERY  
TO THE LOCAL  
DISTRIBUTOR

Your Integrity products are delivered in 10 days to the distributor making your project run smoother. Ten years of an on-time record is something you can count on.

The following features make choosing Integrity even easier.

- 1 Pre-attached folding nailing fin and drip cap for easier installation. Available through-jamb and installation bracket options.
- 2 Factory-installed screens are a standard offering with operating windows. At no extra cost, we can ship your screens separately to reduce on-site damage prior to installation.
- 3 Factory-applied jamb extensions save time and labor. We supply 4 9/16", and 6 9/16" standard width jambs.
- 4 Factory-applied sheetrock return accommodates 1/2" to 5/8" drywall, while the 3/4" receiver accommodates box jambs and thicker installation methods.
- 5 Create your own assemblies with available standard factory mulling, reinforced factory mulling or field mulling kits.
- 6 3" and 1" frame expanders provide installation flexibility, while our frame filler increases the frame depth to 3 1/4" for a seamless replacement installation.
- 7 Special sizes are available on windows and doors to 1/64" for the perfect fit every time.
- 8 J-channel installs easily with various installation applications, while the detailed profile provides a more dramatic finished appearance.

# Casement & Awning

BUILT FOR STRENGTH. DESIGNED FOR FLEXIBILITY.

Multi-point sequential locking system provides superior PG40 rated performance with single lever operation.

ENERGY STAR® qualified and available with Low E1, Low E2, Low E3, or Low E3/ERS insulated glass.

Folding handle provides easy operation and neatly stows out of the way of window treatments and blinds – available in five finishes; White, Almond Frost, Brass, Satin Nickel, and Oil Rubbed Bronze.

Interior screen features an extruded aluminum surround and concealed pressure mounting points for ease of operation and enhanced aesthetics.

Stationary, operating, transom and picture units available.

The amazing strength of Ultrex® fiberglass in a Casement and Awning. These dynamic windows deliver high end performance with the strength and sustainable characteristics of Ultrex. Dual-arm operating hardware and a single lever sequential locking system deliver PG40 performance. A clean design and measured sight lines provide visual depth and a modern classic feel. Six exterior finish colors, five hardware finishes, assorted lite cut configurations, special sizing to 1/64", and available picture and transom units allow for stunning and unique combinations.

A selection of hardware finishes, divided lites and lite cuts provide an abundance of design options.

# Single Hung

DESIGNED FOR BEAUTY. ENGINEERED FOR LIFE.

The All Ultrex® Single Hung comes with a standard aluminum half screen; optional full screen is available.

Sash lock provides a positive detent, reassuring user that the window is either locked or unlocked.

Equal, Cottage, and Reverse Cottage sash provide a variety of looks and checkrail heights.

There is more than a single reason to like this beauty. The All Ultrex Single Hung offers PG50 performance on a majority of sizes. Innovative tilt latches, robust low profile sash lock, factory-applied installation accessories, and superior delivery combine with Ultrex fiberglass construction, Low E glass and ENERGY STAR® qualified performance to make the Single Hung a superior product in both looks and performance. Mull with picture units, transoms, Round Tops, other Single Hung or Polygon units to create unique multiple assemblies. Factory mulling, reinforced mulling and field mulling kits are available.

Removable lower sash easily removes with no tools and no strings or cords to detach.

# Double Hung

STUNNING LOOKS, WITH SURPRISING DEPTH.

The Double Hung is equipped with a standard full screen: optional half screen is available.

Tilt latches are ergonomically designed and easy to operate making tilting and cleaning this window even easier.

Sash lock provides a positive detent, reassuring user that the window is either locked or unlocked.

Equal, Cottage, and Reverse Cottage sash provide a variety of looks and checkrail heights.

Bring traditional beauty where it hasn't been traditional. The All Ultrex® Double Hung window offers clean, even and measured sight lines that provide significant depth where historically only a flat vinyl facade has been present. Add superior PG50 performance on a majority of sizes, factory applied installation accessories and unparalleled delivery and this window not only looks great it performs great. Mull with picture units, transoms, Round Tops, other Double Hungs or Polygon units to create a myriad of assemblies. Factory mulling, reinforced mulling and field mulling kits are available.

Both sash tilt  
and remove easily,  
with no tools or  
strings to detach.

# Glider

EFFORTLESS OPERATION. EASY CHOICE.

The Glider operating sash easily tilts and removes with no tools and no cords or strings to detach.

Tilt latches are ergonomically designed and easy to operate making tilting and cleaning this window even easier.

Discreet and ergonomic pull blends seamlessly with the interior while offering durable performance.

The Glider is available in a triple sash configuration for a more expansive view.

Say goodbye to sagging headers and painful operation of vinyl gliders forever. The All Ultrex® Glider offers Ultrex fiberglass construction that ensures smooth effortless operation for years to come thanks to the superior strength and minimal expansion/contraction properties of Ultrex. Choose an XO, OX or XOX (triple sash) configuration with the confidence that Ultrex construction eliminates sagging headers common to vinyl gliders. An innovative screen design makes removing and installing the screen of our Glider easier than ever. PG40 performance on a majority of sizes and the standard suite of All Ultrex Series options make ordering, delivery, installation and dependable performance effortless.

Triple sash  
option provides  
the appearance  
of a picture  
unit assembly.

# Round Top

A DYNAMIC COMPLEMENT TO TOP OFF YOUR DESIGN.

Glass reinforced composite material complements Ultrex's performance in a radius profile.

Acrylic capping technology delivers consistent finish and durability in all six All Ultrex® Series exterior colors.

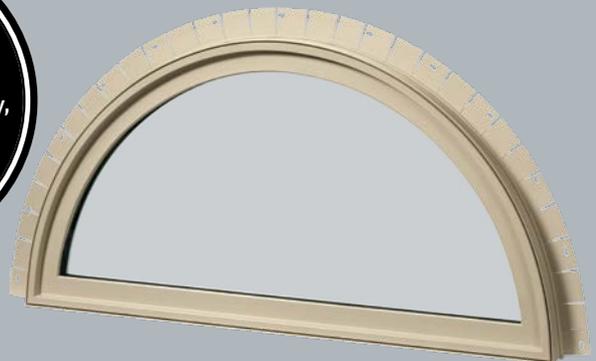

Available nailing fin, installation bracket and through jamb installation.

Perforated folding radius nailing fin provides for simple installation and proper water management.

Available factory and field mulling options.

The All Ultrex Series Round Top is constructed of a glass reinforced composite capped with Integrity® Windows and Doors' acrylic finish technology. The dynamic windows are a great way to top off any project and are available as true half rounds, half rounds above springline and eyebrow above springline configurations. Choose from three installation options, six exterior colors and several glass options to create an individual unit or pair your Round Top with another All Ultrex product to create a unique assembly.

Integrity's Round Tops,  
used separately, or as  
part of a larger assembly,  
bring space and  
dimension to any room.

# Polygon

A NEW ANGLE ON STYLE.

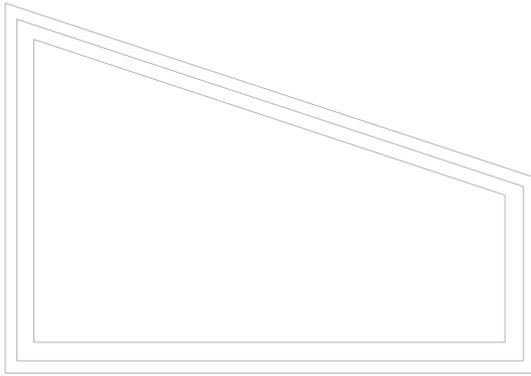

Standard jambs of 4 <sup>9</sup>/<sub>16</sub>" (116 mm) and 6 <sup>9</sup>/<sub>16</sub>" (167 mm) are available factory applied or as an extension kit.

Consistent, fast delivery applies to even the most unique products.

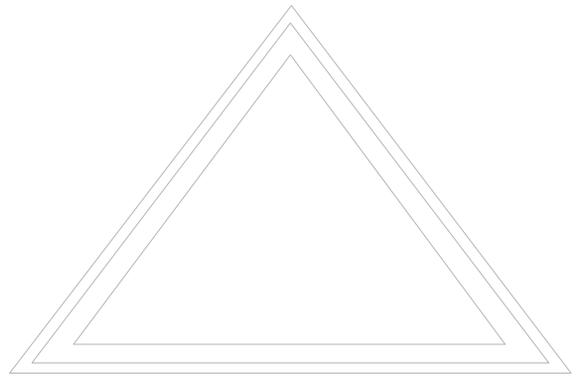

Enhance your windows by including the unique shapes and sizes of Integrity® All Ultrex® Polygons. Choose from eight popular shapes; including rectangles, triangles, pentagons, octagons and trapezoids. Integrity Polygons are available in sizes up to 49 square feet with a maximum span of 9 feet. So think big and imagine the possibilities – sidelites, transoms, flankers, unique assemblies or stand alone units. These windows offer WDMA Performance Grade 50 Hallmark Certification (PG50), and same service, delivery, energy efficiency, strength, durability and options as the rest of the All Ultrex series of products. So dare to dream with confidence, because unique just got a whole lot easier.

Big views beg for big windows. Polygons are available with lengths of 96" and overall dimension of 49 square feet.\*

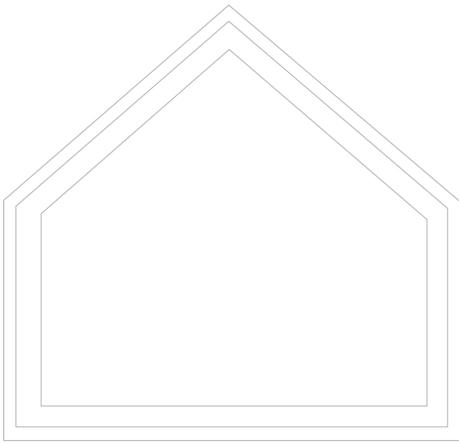

\* Polygons maximum size is 72" x 96". When the longest leg exceeds 72" the shortest leg cannot exceed 72".

# Sliding Patio Door

IT WORKS, BEAUTIFULLY.

A top hung sliding screen operates smoothly free of dirt and debris.

Matching handle set design provides style and security.

Interior and exterior handle available in White, Pebble Gray, Cashmere, Bronze, Evergreen and Ebony.

Optional 32" Handle provides 32" net clear opening on 3' panel configurations.

Special sizing available on 2-panel configurations.

Welcome to consistent durable performance. The All Ultrex® Sliding Patio Door provides low maintenance PG30 performance that vinyl just can't match. Ultrex construction ensures this door has the strength, durability and resilience to stand the test of time. Always straight, square and true, so effortless operation is a constant. The All Ultrex Sliding Patio Door offers a large daylight opening, 2-panel and 3-panel configurations, and heights up to 8 feet high. A handle set with matching interior and exterior styling and a top hung screen further this door's amazing style, performance and dependability.

Our doors come with standard tempered Low E2 insulated glass with argon gas. Optional Low E1 Low E3 and Low E3/ERS meet diverse energy efficiency needs.

# ORDERING INTEGRITY WINDOWS AND DOORS

Integrity® All Ultrex® Series products are sized with consistent nominal sizing to simplify specification and ordering.\* Each product section offers product codes for ordering under each unit. Metric millimeter measurements are in parentheses.

You'll notice four measurements for each window or door: masonry opening, rough opening, frame size and day light opening size. The masonry opening is for a home built with brick or stone; rough openings are for houses with wood, vinyl or metal siding. Frame size measures from edge to edge of the unit; daylight opening indicates the dimension of total visible glass in a single sash.

**Mulling Options** - A variety of standard factory mulled and reinforced factory mulled combinations are available.

All Ultrex Mulling Configurations	Maximum Overall Rough Opening not to exceed:	Maximum Units Wide by High
Casement / Awning Single Hung / Double Hung	114" (2896) X 78" (1981)	6 Wide X 1 High
Picture / Transom / Direct Glaze	96" (2438) X 96" (2438)	5 Wide X 5 High
Glider	114" (2896) X 60" (1524)	3 Wide X 1 High
Picture / Transom / Direct Glaze	72" (1829) X 78" (1981)	2 Wide X 2 High

Field mulling kits available to create your own unique multiple assemblies. Please contact your local Integrity from Marvin® representative for more information.

## Examples of Possible Configurations

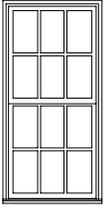

\* Polygon units are specified according to guidelines on page 68.

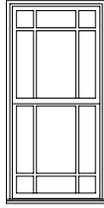

# INTEGRITY LITE CUTS

GBG available in standard Rectangular lite cut, shown. Other GBG lite cuts shown on page 35.

E = These windows (in equal sash) meet National Egress Codes for fire evacuation. Local codes may differ.

Details and Elevations not to scale.

Available in equal, cottage and reverse cottage sash configurations. Cottage and reverse cottage sash configurations are not available on 20 call number heights.

Obscure Glass option available on all units.

Units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

Special sized units available within product size matrix. See your Integrity retailer.

See page 87 for specific PG Ratings.

### Multiple Assemblies

Multiple assemblies can be factory mullled.

**MAXIMUM ROUGH OPENING** not to exceed 114" X 78". Maximum up to 6 units wide by 1 unit high.

**MAXIMUM ROUGH OPENING** not to exceed 96" X 96". Maximum up to 5 units wide by 5 units high.

Field mull kits are available. Structural mullion reinforcement is required for some assemblies.

Please consult your local Integrity from Marvin representative for more information.

## Construction Details

Head Jamb & Sill

Jamb

Vertical Mullion

Horizontal Mullion Transom/Operator

E = These windows (in equal sash) meet National Egress Codes for fire evacuation. Local codes may differ.

\* This product is only available field muller. Details and Elevations not to scale.

Available in equal, cottage and reverse cottage sash configurations. Cottage and reverse cottage sash configurations are not available on 20 and 66 call number heights.

Obscure Glass option available on all units.

Units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

Special sized units available within product size matrix. See your Integrity® retailer.

See page 87 for specific PG Ratings.

### Multiple Assemblies

Multiple assemblies can be factory muller.

**MAXIMUM ROUGH OPENING** not to exceed 114" X 78". Maximum up to 6 units wide by 1 unit high.

**MAXIMUM ROUGH OPENING** not to exceed 96" X 96". Maximum up to 5 units wide by 5 units high.

Field mull kits are available. Structural mullion reinforcement is required for some assemblies.

Please consult your local Integrity from Marvin® representative for more information.

GBG available in standard Rectangular lite cut, shown. Other GBG lite cuts shown on page 35.

E = These windows (in equal sash) meet National Egress Codes for fire evacuation. Local codes may differ.

Details and Elevations not to scale.

Available in equal, cottage and reverse cottage sash configurations. Cottage and reverse cottage sash configurations are not available on 20, 60 and 66 call number heights.

Obscure Glass option available on all units.

Units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

Special sized units available within product size matrix. See your Integrity® retailer.

See page 87 for specific PG Ratings.

### Multiple Assemblies

Multiple assemblies can be factory mullled.

**MAXIMUM ROUGH OPENING** not to exceed 114" X 78". Maximum up to 6 units wide by 1 unit high.

**MAXIMUM ROUGH OPENING** not to exceed 96" X 96". Maximum up to 5 units wide by 5 units high.

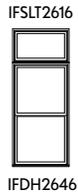

Field mull kits are available. Structural mullion reinforcement is required for some assemblies.

Please consult your local Integrity from Marvin® representative for more information.

GBG available in standard Rectangular lite cut, shown. Other GBG lite cuts shown on page 35.

E = These windows meet National Egress Codes for fire evacuation. Local codes may differ.

Details and Elevations not to scale.

Obscure Glass option available on all units.

Units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

Special sized units available within productsize matrix. See your Integrity retailer.

See page 87 for specific PG Ratings.

### Multiple Assemblies

Multiple assemblies can be factory mullied.

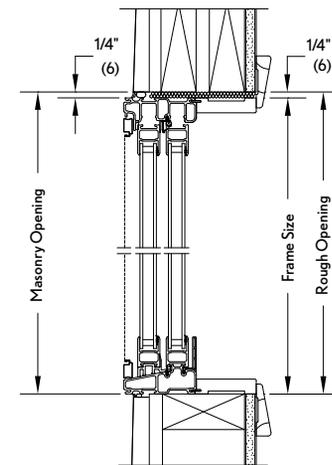

**MAXIMUM ROUGH OPENING** not to exceed 114" X 60". Maximum up to 3 units wide by 1 unit high.

**MAXIMUM ROUGH OPENING** not to exceed 72" X 78". Maximum up to 2 units wide by 2 units high.

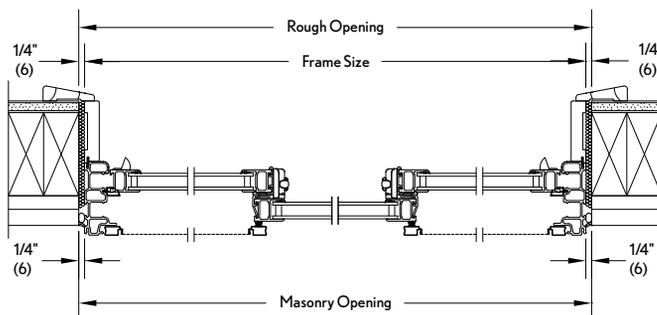

Field mull kits are available. Structural mullion reinforcement is required for some assemblies.

Please consult your local Integrity from Marvin representative for more information.

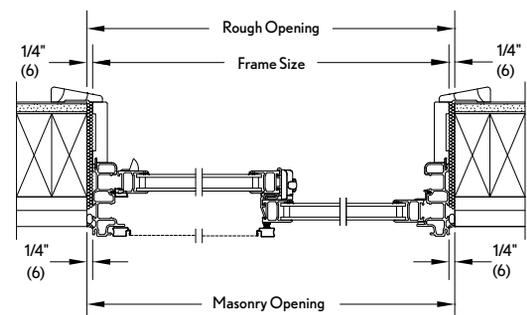

## Construction Details

GBG available in standard Rectangular lite cut, shown above. Other GBG lite cuts shown on page 35. (Not available on In-Sash Transom units.)

Details and Elevations not to scale.

Special sized units available within product size matrix. See your Integrity® retailer.

See page 87 for specific PG Ratings.

### Multiple Assemblies

Multiple assemblies can be factory mullled.

**MAXIMUM ROUGH OPENING** not to exceed 114" X 78". Maximum up to 6 units wide by 1 unit high.

**MAXIMUM ROUGH OPENING** not to exceed 96" X 96". Maximum up to 5 units wide by 5 units high.

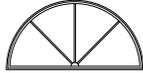

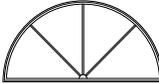

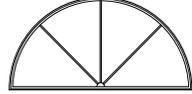

Field mull kits are available. Structural mullion reinforcement is required for some assemblies.

Please consult your local Integrity from Marvin® representative for more information.

## Construction Details

### Multiple Assemblies

**MAXIMUM ROUGH OPENING - IFRT TO IFCA, IFAWN, IFSWP, IFSH, IFDH, IFSLP, IFDGP (Rectangle), IFSLT, IFSWT not to exceed 96"x96" up to 5W2H.**

**MAXIMUM ROUGH OPENING - IFRT to IFGL not to exceed 72"x78" up to 2 wide 2 high.**

Both horizontal and vertical field mull kits are available. Structural mullion reinforcement is required for some assemblies. Please consult your local Integrity from Marvin representative for more information.

GBG only available in standard Round Top pattern, shown above.

Details and Elevations not to scale.

Sample multiples assemblies shown. Contact your Integrity from Marvin representative for more information.

## How to Specify

When ordering a Trapezoid, Triangle, or Rectangle window, provide a sketch of the unit as viewed from the exterior, also include key Rough Opening dimensions.

Example: To order a window of a Trapezoid opening provide the measurements of A, B, and C as indicated. For other shapes, give the dimensions shown.

## SPECIFICATION NOTES:

All units are subject to validation.

Maximum/Minimum Guidelines

Maximum Square Footage: 49 sq. ft. of Rough Opening

Maximum Width: 114" Rough Opening

Maximum Height: 114" Rough Opening

Minimum (RECT, P3, P4, P5): 12" x 12" Rough Opening

Minimum (P8): 18" x 18" Rough Opening

Minimum Short Leg (P4, P5): 8" Rough Opening

P3 Pitch: 3/12 to 36/12 Pitch Available

P4 Pitch: 36/12 Maximum Pitch Available

P5 Pitch: 36/12 Maximum Pitch Available

## MULTIPLE ASSEMBLIES

Multiple assemblies can be factory mulled.

**MAXIMUM ROUGH OPENING:** not to exceed 114" x 78".

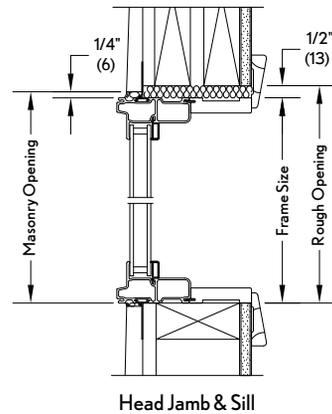

Maximum up to 6 units wide by 1 unit high.

**MAXIMUM ROUGH OPENING:** not to exceed 96" x 96".

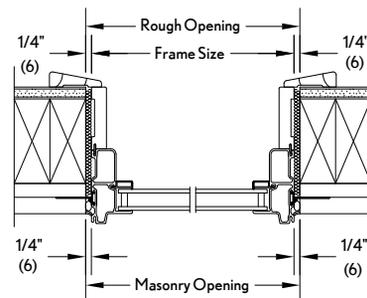

Maximum up to 5 units wide by 5 units high.

**NOTE:** Units with Rough Opening larger than 37.75 sq. ft. will be standard tempered.

GBG available in standard Rectangular lite cut, shown above. Other GBG lite cuts shown on page 35. (Not available on In-Sash Transom units.)

Details and Elevations not to scale.

Special sized units available within two panel product size matrix. See your Integrity retailer.

See page 87 for specific PG Ratings.

### Multiple Assemblies

Multiple assembly units can be factory mulled up to 1 unit wide by 2 units high.

**MAXIMUM ROUGH OPENING:**  
not to exceed 72" x 100 1/2". Field mull kits available for up to 3 units wide by 2 units high not to exceed 110" x 112". Structural mullion reinforcement is required for some assemblies.

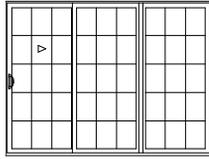

Please consult your local Integrity representative for more information.

E These units meet National Egress Codes requiring 5.7 SF clear opening, 20" clear width, and 24" clear height, not to exceed a floor to sill height of 44". Code restrictions may vary depending on local building codes.

\* Floor to clear opening is calculated using 6'-10 1/4" from finished floor to rough opening header.

\*\* These units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

E These units meet National Egress Codes requiring 5.7 SF clear opening, 20" clear width, and 24" clear height, not to exceed a floor to sill height of 44". Code restrictions may vary depending on local building codes.

\* Floor to clear opening is calculated using 6'-10 1/4" from finished floor to rough opening header.

Units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

E These units meet National Egress Codes requiring 5.7 SF clear opening, 20" clear width, and 24" clear height, not to exceed a floor to sill height of 44". Code restrictions may vary depending on local building codes.

\* Floor to clear opening is calculated using 6'-10 1/4" from finished floor to rough opening header.

Units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

E These units meet National Egress Codes requiring 5.7 SF clear opening, 20" clear width, and 24" clear height, not to exceed a floor to sill height of 44". Code restrictions may vary depending on local building codes.

\* Floor to clear opening is calculated using 6'-10 1/4" from finished floor to rough opening header.

Units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

E These units meet National Egress Codes requiring 5.7 SF clear opening, 20" clear width, and 24" clear height, not to exceed a floor to sill height of 44". Code restrictions may vary depending on local building codes.

\* Floor to clear opening is calculated using 6'-10 1/4" from finished floor to rough opening header.

Units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

E These units meet National Egress Codes requiring 5.7 SF clear opening, 20" clear width, and 24" clear height, not to exceed a floor to sill height of 44". Code restrictions may vary depending on local building codes.

\* Floor to clear opening is calculated using 6'-10 1/4" from finished floor to rough opening header.

Units may optionally include a window opening control device tested to ASTM F2090-10, which can be released from the inside without the use of a key, tool, special knowledge, or force greater than that required for normal unit operation.

# ALTITUDE GUIDELINE

Integrity® recommends the maximum altitude limitation for its seal insulated glass units. These limits do not account for glass deflection which may take on a pillowed appearance below these elevations. The limits may be affected by site, location, temperature and/or divided lites. Integrity does not recommend the use of IG units in excess of these specified guidelines. These limitations apply to Integrity units and should not be interpreted as an industry standard.

Integrity Windows and Doors provides these elevation guidelines as a convenience to our customers. Integrity does not recommend installation above the elevation guidelines, and products installed above such elevations are not warranted. A variety of factors, including ambient temperature, altitude, and other conditions outside Integrity's control may cause glass deflection, distortion, or an increase in convexity of the insulating glass units. Deflection, distortion, and increased convexity are not considered product defects and are not covered under Integrity's general warranty; capillary tubes may minimize these effects. Integrity does not warrant the amount or percentage of argon or other inert gas present in insulating glass at any time after manufacture. Inert gas dissipates over time, and may be ineffective in products manufactured with capillary tubes. Thermal efficiencies vary with the application of the product. Integrity does not warrant that a specific level of thermal efficiency will be achieved by inert gas, low emissivity coatings, or other product features. Determining the suitability and compliance with local or other applicable building codes or standards, of all building components, including the use of any Integrity product, and the design and installation of any flashing or sealing system, is the responsibility of the buyer, user, architect, contractor, installer, and/or other construction professional. Integrity will not be liable for any problem or damage relating to inappropriate or faulty building design or construction, maintenance, installation, or selection of products. Integrity does not warrant any product's compliance with local or other applicable building codes or standards, or its suitability for use in connection with a project seeking third party certification to any standard.

Integrity® Windows and Doors provides these elevation guidelines as a convenience to our customers. Integrity does not recommend installation above the elevation guidelines, and products installed above such elevations are not warranted. A variety of factors, including ambient temperature, altitude, and other conditions outside Integrity's control may cause glass deflection, distortion, or an increase in convexity of the insulating glass units. Deflection, distortion, and increased convexity are not considered product defects and are not covered under Integrity's general warranty; capillary tubes may minimize these effects. Integrity does not warrant the amount or percentage of argon or other inert gas present in insulating glass at any time after manufacture. Inert gas dissipates over time, and may be ineffective in products manufactured with capillary tubes. Thermal efficiencies vary with the application of the product. Integrity does not warrant that a specific level of thermal efficiency will be achieved by inert gas, low emissivity coatings, or other product features. Determining the suitability and compliance with local or other applicable building codes or standards, of all building components, including the use of any Integrity product, and the design and installation of any flashing or sealing system, is the responsibility of the buyer, user, architect, contractor, installer, and/or other construction professional. Integrity will not be liable for any problem or damage relating to inappropriate or faulty building design or construction, maintenance, installation, or selection of products. Integrity does not warrant any product's compliance with local or other applicable building codes or standards, or its suitability for use in connection with a project seeking third party certification to any standard.

# PERFORMANCE GRADE (PG)

A performance grade rating, as created by AAMA/WDMA/CSA Standards, is a measure of the overall tested performance of a window or door that addresses all of the applicable requirements of the Standards. A product receives a PG rating if it meets all performance requirements, including: air infiltration resistance, water penetration resistance, structural performance, ease of operation, durability, weatherability, and resistance to forced entry. The higher a PG number a product has, the better the performance. As a frame of reference: PG 40 means that a product is tested structurally to a minimum 60 pounds per square foot (psf) and must withstand water penetration under conditions equal to 8 inches of rain per hour driven by a minimum of 50 mph winds.

## WDMA STANDARDS

The Window and Door Manufacturers Association (WDMA), in conjunction with other organizations in the industry, has developed standards that make it easy to compare windows from different manufacturers, testing product performance regarding air and water infiltration, as well as physical loads on the exterior and interior (very important when you consider the pressure differentials that can occur in coastal areas, as well as forced entry resistance). Integrity® products are rated in accordance with the North American Fenestration Standard (AAMA/WDMA CSA 101/I.S.2/A440) and are certified in compliance with the WDMA Hallmark program.
